

Report  
On  
**Sustainable Development Goals  
2020**

"The vision of the Technical University for 2024 represents the projection of a realistic scenario that reflects the centenary history of our university, of the exceptional values and achievements obtained so far, combined in terms of technological trends, globalization processes and last but not least of the European aspirations towards a sustainable society based on cohesion through education, science and culture." (Strategic plan UTCN 2020-2024)

*Motto (Rector's Report 2020)*

*"The future is in the eyes of the one who looks away"*

The 2030 Agenda for Sustainable Development, adopted by all Member States of the United Nations in 2015, provides a common plan for peace and prosperity, for people and the planet, now and in the future. At its core are the 17 Sustainable Development Goals (SDGs), which are an urgent call for action from all developed and developing countries - in a global partnership. Thus, it was agreed that the elimination of poverty and other deprivations must converge with various strategies that improve health and education, reduce inequality and stimulate economic growth, while at the same time addressing climate change and contributing to the preservation of the environment.

Higher education did not play a significant role in the initial Millennium Development Goals (SDGs) for the period 2000-2015. But this has changed profoundly with the definition of the DD for the period 2015 – 2030, so now, universities everywhere are interested in achieving these ambitious goals. The University as an institution has a long history, starting as an educational institution, subsequently assuming the function of creating knowledge (research) and more recently the so-called third mission of active employment in society, thus having the role of contributing to the development of society.

The Technical University of Cluj-Napoca is an active partner in the national and international academic community and has an involved presence in the local and regional community.

The purpose of this report is to highlight the involvement and impact in society of the Technical University of Cluj-Napoca in achieving the Sustainable Development Goals (SDGs) adopted by the UN member states in 2015.

The information in this report is taken from the Rector's Report (2019 and 2020) and from the Newsletters on the activity of the Board of Directors, and the bibliometric statistical data are taken from Scopus (SciVal). They represent the activities at the level of the community of teachers, researchers and students from the Technical University of Cluj-Napoca and reflect their alignment with the Sustainable Development Goals.

# PARTNERSHIPS FOR GOALS

---

This objective reflects the fact that partnerships are necessary to ensure the Sustainable Development Goals. Partnerships designed for common goals are stronger if they are achieved between governments, industries and civil society. This objective includes various elements such as financial and development support, public policies, access and development of innovative technologies development of various resources addressing a whole range of systemic aspects.

**I. University partnerships at governmental level or with regional non-governmental organizations for direct involvement or contribution in terms of identifying problems and challenges, developing policies and strategies on sustainable development goals.**

**Clusters (founding member/member)**-ClujIT([www.clujit.ro](http://www.clujit.ro)),C-EDU([c-edu.ro](http://c-edu.ro)),

# QUALITY EDUCATION

---

Quality education is essential for sustainable development, being an area in which universities excel. Inclusive and equitable education supports addressing various challenges specific to sustainable development is a mechanism for reducing inequities and improving the quality of life

UTCN aims to support the increase of the quality of life and the degree of well-being through support **measures** for the assurance of learning throughout life (LLL-lifelong learning), by providing the general public with access to various types of educational resources, courses and scientific events.

## The most important results are:

- Center for Studies and Learning - CESTI that provides various resources and facilities, remedial and personal development programs  
<https://cesti.utcluj.ro/>
- Provides access to postgraduate, training and development, professional conversion and HRF (LLL type) courses through the DECIDFR platform  
<https://decidfr.utcluj.ro/>
- Provides an E-Campus platform based on Microsoft technologies for e-learning and hybrid education and the digitization of processes  
<https://ecampus.utcluj.ro/>, <https://utcluj.digital/ecampus.html>
- Provides educational resources accessible online (University courses, Problem collection, Guides for practical activities) to the general public  
<https://biblioteca.utcluj.ro/carti-online-cu-coperta.html>
- Get involved in the community through preparation activities for admission  
<https://admitereonline.utcluj.ro/matematica/>

## AFFORDABLE AND CLEAN ENERGY

This objective proposes global, equitable access to secure, sustainable energy in an affordable manner, being essential because modern energy supports the other sustainable development goals.

UTCN ensures learning and research conditions in modern spaces, in compliance with the latest energy efficiency norms.

The University organizes a series of support activities such as specialized master's courses, postgraduate **courses** of specialization, workshops with a focus on energy, resources and environment.

### Realizations

Energy efficient renovations, rehabilitations and constructions, according to energy sustainability plans and climate action, with carbon reduction, according to energy consumption reduction plans - EIB partnership

Research performance

# INNOVATIVE INDUSTRIES, RESILIENT INFRASTRUCTURES

---

This objective focuses on providing an infrastructure capable of supporting sustainable development. Economic growth and the continuous provision of health services, education and a decent standard of living are based on quality infrastructure, and innovation, science and technology are crucial for the development of a sustainable infrastructure.

UTCN, considers the research essential in analyzing and solving global problems, which is why it provides mechanisms for stimulating research and publishing the results with maximum impact and visibility.

# CITIES AND SUSTAINABLE COMMUNITIES

The objective promotes sustainable cities and communities, reducing the negative impact of cities on the environment, supporting an inclusive, safe, resilient and sustainable context for cities and their communities.

UTCN carries out the promotion and protection of the material cultural heritage in the spaces where it carries out its activity, providing open access and ensuring a good preservation of them by identifying the necessary resources. Through the projects in which it is involved, the University aims to support the intangible cultural heritage by investing in projects and events that promote this heritage. It also ensures the promotion and support of sustainable development of the cities in which the material heritage resides.

## UTCN results for Sustainable Development Goals

**Fig. Scientific production/sustainable development goals (SDG) and impact by citations, with ordering by volume of publications**

**Fig. Scientific production/sustainable development goals (SDG) and impact by citation, with ordering by impact**

"Sustainability touches everything, from the way we value and respect each other, which is expressed in policies concerning education, security and wellbeing, to how we measure wealth, value commodities and calculate ecosystem services. So, when something touches so many things, addressing one aspect of sustainability requires addressing many other aspects." (SDG Report, The University of Sidney)
