*„Sustainable Development represents, in the Romanian context, the desire to achieve a balance, a synthesis between the aspirations of the free-born citizen, the society on which it depends and through which it is defined, and the context that allows self-realization. This balance starts from man, the central actor who seeks an individual balance and favorable conditions to achieve it. The favorable conditions are influenced by the society that must support and motivate him and by the environment through which he finds himself and can find his balance. The role of the state in the context of sustainable development is to help achieve this balance, not only for citizens now, but also for future generations.“*

The 2030 Agenda for Sustainable Development, adopted by all United Nations member states in 2015, provides a common plan for peace and prosperity for people and planet, now and in the future. At its heart are the 17 Sustainable Development Goals (SDGs), which represent an urgent call to action from all countries - developed and developing - in a global partnership. Thus, it was agreed that the elimination of poverty and other deprivations must be convergent with various strategies that improve health and education, reduce inequality and stimulate economic growth, while addressing climate change and contributing to environmental conservation.

Higher education did not play a significant role in the original Millennium Sustainable Development Goals (SDGs) for the period 2000 – 2015. But this changed profoundly with the definition of the SDGs for the period 2015 – 2030, so now universities everywhere are interested in achieving these ambitious goals. The university as an institution has a long history, starting as an educational institution, later assuming the function of knowledge creation (research) and more recently the so-called third mission of active engagement in society, thus having the role of contributing to the development of society.

The Technical University of Cluj-Napoca is an active partner in the national and international academic community and has a continuously involved presence in the local and regional community. The purpose of this report is to highlight the involvement and impact in society of the Technical University of Cluj-Napoca in achieving the Sustainable Development Goals, including examples of initiatives, events and projects that provide impact from the perspective of the 17 sustainable development goals.

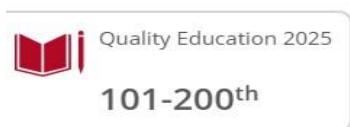

In the **academic year 2023-2024**, the third evaluation of the University was carried out in the [UIGreenMetric](#) international ranking - **position 793**.

The University's impact related to the Sustainable Development Goals specific to the prestigious [Times Higher Education International Impact Ranking 2025](#) edition, was evaluated as follows:

- for **SDG7-Clean Energy** - position **100-200** at the international level (out of 1181 universities) and **FIRST position at the national level**,
- for **SDG9-Industry, Innovation, Infrastructure**- position **200-300** at the international level (out of 1156 universities) and **FIRST position at the national level**
- for **SDG4 - quality education**, position **100-200** at the international level (out of 1975 universities) and **second position at the national level**,
- and for **SDG11-Sustainable cities and communities**' position **600-800** at international level (out of 1154 universities), **third position at national level**.

## Impact Rankings

Select the type of ranking below to see stats

### Impact Ranking positions 2022 to 2025 ^

2025	2024	2023	2022
401-600 <sup>th</sup>	801-1000 <sup>th</sup>	1001+	1001+

Precise ranks and overall scores are shown for the institutions toward the top of a ranking; for institutions with banded ranks, please see the relevant ranking tables for an

This Report for the **academic year 2023-2024 regarding the Sustainable Development Objectives in the Technical University of Cluj-Napoca** reflects how the University relates to these objectives, identifying and carrying out initiatives, events and impact projects on them.

Complementary to this report , the updated information on progress in various SDG's is published on the Website [sustainability.utcluj.ro](http://sustainability.utcluj.ro).

## Section I. Areas of intervention according to sustainability strategy

### 1.1. Education and Research (ER)

The Technical University of Cluj-Napoca is a multicultural university that offers **188 bachelor's and master's in 2024** programs in Romanian, German, English and French, which address various aspects of sustainable development. Complementary to formal education, a series of post-graduate training courses or professional retraining offer specialized courses in fields such as Energy management or Energy audit, Green buildings, Circular Economy. Fundamental research, but especially applied research, achieved remarkable results through the projects won at international and national level addressing topical issues, most of which are in conjunction with the objectives of sustainable development.

In the Technical University of Cluj-Napoca, educational and research-innovation activities are the basis for preparing the next generations of students, researchers and innovators, able to address the evolutionary challenges of society in the context of sustainable development. As a facilitator with a significant research activity at national and European levels, the University integrates and supports an important number [Research Centers](#) and [Multidisciplinary Research Centers](#) which are aware of the importance of sustainable development, and the implementation of a culture of sustainability at the level of the entire community, through formal and non-formal education and by stimulating the multidisciplinary research activity that integrate various aspects regarding sustainability.

At the institutional level, there has been continuous progress in terms of the educational context - various student scholarships, accommodation and meal facilities, didactic and individual study spaces, specialist counseling centers - [the OCOC Center](#) - career counseling and guidance, [the CESTI Center](#) - Studies and learning, [the Alumni Office](#).

Social and medical services are represented at the campus level by general medical and dental offices, and the maintenance of the state of health at the level of the entire academic community is ensured by the spaces intended for sports activities (Olympic pool, multifunctional sports fields, gyms per campus).

Cultural services offer a wide framework for involvement and participation through various artistic activities.

### Achievements

- Identification and documentation at the level of the current Academic Programs, of the curricular content that aims and promotes sustainability
- Providing opportunities for non-formal Learning about sustainability - General courses for a wide audience and for the Community, so as to become an active player in the process of transition to the green-sustainable Campus (Green Campus)
- Promoting and facilitating multidisciplinary and the perspective generated by sustainable development in all Research Activities and Projects
- 13 specialized study programs at master's level in the field of sustainable development
- 1 general level course, 166 specific courses at Bachelor level
- >2000 scientific articles identified by Scopus related to sustainable development objectives for the period of 2020-2024 that accumulated >22000 citations
- 19.58 million Eur European Research projects (H2020,FP7)

## 1.2. Energy (E)

In the current context of an energy transition towards renewable sources, decarbonization and environment with low greenhouse gas emissions, the University, through all its actions and policies, is in agreement with the objectives, financial allocations and actions of the decision-makers in Romania and at European levels, the most important being the improvement of energy efficiency by at least 45% by 2030, and the introduction of local renewable sources for self-consumption, respectively.

Addressing a major challenge such as climate change requires a truly collaborative, society-wide perspective. The Technical University of Cluj Napoca is an essential partner and actively involved in the education, creation and support of policies and their implementation on Campus and various communities, including in direct relationship with the Municipality of Cluj Napoca a community that has committed to decarbonize its current level by over 80% by 2030.

At the Technical University of Cluj-Napoca we have also committed to act as an example of the best practices at local and regional levels and to play our leader in the transition process towards the realization of a Green Campus. The research center ENTREC is actively involved in research with more than 50 projects and education with more than 20 specialized courses in this area and the results obtained in THE Impakt ranking B as first place at national level and 100-200 position at international level confirm his involvement. Building on the progress made at University level in recent years, we will continue to promote and use new technologies to increase the energy efficiency of heritage buildings according to the [Action Plan for Climate and Sustainable Energy \(PACED\)](#), supporting an ambitious investment transition plan to carbon neutrality.

### Achievements

- Actively tracking the reduction of energy consumption - Internal monitoring at the level of the [ENTREC Energy Transitions Center](#), through a dedicated energy consumption software system
- Making sustainable purchases - following the [Sustainable Procurement Policy](#)
- Community awareness of the importance of the energy transition and the role that everyone has by courses and workshops
- Identifying and establishing realistic objectives in the field of sustainable energy and greenhouse gas emissions - equipment projects as a prosumer of suitable buildings in the Campus
- Diversifying energy supply by investing in renewable energy sources and reinvesting energy cost savings in new Sustainability Projects and Living labs.

## 1.3. Campus and Community (CC)

We fully agree that not only health education, but also healthy ecosystems - Campus and Community, are the essential foundation for good life. Globally, health is reflected in all sustainable development goals through direct or indirect correlation. We are fully aware that we depend on the environment and nature to support our educational and economic processes, but also food security, health and the quality of life of the Community.

Sustainable development aspires to improve the health of the environment, society and the economy. The health of the community is determined by a wide range of social, environmental factors and various economic influences. The sustainability and vitality of our University depends on the health of the community and each other.

Increasing the availability of clean water, green energy, providing opportunities for active transport, identifying ways to reduce the waste generated and dispose of single-use plastics, aiming at easy access to safe and clean drinking water, providing healthy, safe and sustainable services, creating opportunities for physical activity, all of which have a positive effect and impact on health and well-being at individual and community level.

The mission of the University is to create an environment favorable to the entire Community, by reorienting the services in accordance with the principles of sustainable development and strengthening community action.

## Achievements

- Application of a unified approach at the level of the entire University from the perspective of information and involvement, with the aim of improving the well-being of the entire community -[Strategic Sustainability Plan](#)
- Digitization of the University through the [EUT4ALL digital](#) project - the transformation of the university ecosystem through the digital transition towards a sustainable European future
- Fully functional [eCampus](#) for over 20,000 active users (Elearning and interaction)
- Student Digital Campus - [MEUtCluj](#) applications
- Institutional Cloud - [CloudIT](#) - support for multidisciplinary research activities
- The [Gender Equality Strategy](#) reflecting the current and evolving perspective of the University on this issue
- Improvement of environmental management on Campus (renovation of the Observatory Restaurant, 2 new sports spaces - Baia-Mare multifunctional field, Mărăști Campus sports field equipment, new building at Alba Iulia extension)
- Minimizing the impact on the University's own ecosystem and the environment through operational and infrastructure development activities –85% buildings were high class *Energy certificated*.

### 1.4. Governance and Partnerships (GP)

At the Technical University of Cluj-Napoca we are aware that sustainable development cannot be adequately approached by a single group working in isolation. The complex problems that arise cover many areas of our work and require an integrated approach, bringing together our strengths as an education and research institution.

Social and environmental challenges are addressed by teachers and researchers in various fields, sustainability projects in Campus are implemented by technical and administrative staff, and students ensure that their priorities are achieved by getting involved in shaping our agenda.

As an ongoing basis, we aim to expand partnerships to increase opportunities for transdisciplinary research in the field of sustainability, to increase the visibility of University's activities in this field and to gain knowledge to valuable international practices. The University aims to optimize development opportunities in a sustainable manner and to integrate environmental and sustainability concerns into inter-university partnerships or with the socio-economic agents.

## Achievements

- Over 300 active partnerships, of which 35 are strategic partnerships ( 3 new in 2023-2024 academic year)
- Fully functional eCampus for over 20,000 active users (Elearning and interaction)
- Institutional Cloud operationalization - CloudIT, Electronic Registry (63,703 documents and approx. 24,000 users)
- more than 55 EUT+ meetings for governance and projects, the establishment of EUT+ Clusters for research and curriculum projects- 2023-2025 EUT+ leadership performed by Technical University of Cluj Napoca

- University communities in incorporating the objectives of sustainable development in education, research, services and the processes that take place in the University

Creating a university based on [ECampus](#), CloudIT technology that improves the student experience and supports the efficiency of information and operations

- Encouraging [Entrepreneurial Activities](#) for resource efficiency and increasing income diversity to finance future growth and development
- Sustainable development strategy of Cluj Napoca Technical University 2022-2030
- Plan for climate and sustainable energy - PACED Plan
- Energy policy implementation and monitoring
- Sustainable procurement policy continuously applied
- Action plan on climate change
- Strategic plan regarding gender equality implementation and monitoring
- Strategy for University digitalization and monitoring mechanisms for progress.

## Section II. Sustainable development of the University- PERMANENT ACTIVITIES

**In section II there are presented permanent activities which contribute to SDG goals achievements and in Section III the progress in these achievements is presented for 2023-2024 academic year.**

Considering the provisions of the Strategic Plan of the Technical University, the Sustainable Development Strategy adopted in 2022, the indicators collected for the international rankings UI Green Metric and THE Impact Ranking, there is a need to implement sustainable development policies and mechanisms at the institutional level, which aim at achieving the objectives set for the period 2022-2030.

This *Sustainable Development Report for the year 2024* reflects the Status and Progress achieved in a point-by-point perspective, at the level of each of the 17 indicators.

### GOAL 1. NO POVERTY

This objective aims at how universities address the problem through all their actions and initiatives, having a direct role in reducing the degree of poverty in their own community, both through quality education and through concrete material support, thus reducing the degree of intergenerational poverty.

UTCN considers it a priority to support the smooth running of the educational process and the formation of skills and competencies needed on the labor market, thus through its partnerships it has achieved the continuous provision of a set of scholarships that reward excellence and creativity.

**(81 Scopus articles)**

Date	Initiative/Event/Project
permanent	OCOC center ( <a href="https://www.utcluj.ro/ococ/servicii/">https://www.utcluj.ro/ococ/servicii/</a> ) offers career counselling and guidance (Career Kit brochure, Open Day, UTCN Caravan in high schools, 'Freshers' Week)

## SDG1 in numbers

**Over 2000 scholarships and grants**

**250 students enrolled in personal development programs**

**35% of students participating in counseling and mentoring activities**

**200 students in admission preparation programs and 300 students in remedial programs/year**

**18% of research projects relevant to SDG1**

**16% Relevant partnerships SDG1**

## GOAL 3. GOOD HEALTH AND WELL BEING

**3** GOOD HEALTH  
AND WELL-BEING

Ensuring a healthy life and promoting well-being, regardless of age, is an essential component of sustainable development, which can be addressed both through the correct identification of various diseases and through the implementation of intelligent solutions capable of increasing the degree of physical or mental comfort, respectively to monitor or maintain a certain level of health. UTCN has remarkable results in this field through its presence in a series of international research projects, through the implementation of practical solutions adapted to certain needs in the CESTER Robotics Research Center and through continuous monitoring of the health status of community members.  
**(735 Scopus articles)**

## SDG3 in numbers

**7 sports terrains (new one in 2024), Olympic nautical base**

**38% of research projects relevant to SDG3**

**55% SDG3 specific partnerships**

## GOAL 4. QUALITY EDUCATION

Quality education is essential for sustainable development, being an area in which universities excel. Inclusive and equitable education supports the addressing of various challenges specific to sustainable development, is a mechanism for reducing inequities and improving the quality of life.

UTCN aims to support the increase of the quality of life and the level of well-being through support measures to ensure lifelong learning (LLL-lifelong learning), by providing access to various types of educational resources, courses and scientific events.

## SDG4 in numbers

**34% of research projects relevant to SDG4**

**69% of partnerships**

## GOAL 7. CLEAN AND AFFORDABLE ENERGY

This objective proposes global, equitable access to safe, sustainable energy in an accessible manner, being essential because modern energy supports the other sustainable development objectives. UTCN provides education and research conditions in modern spaces, in compliance with the latest energy efficiency standards. The university organizes a series of support activities such as specialized master's courses, postgraduate specialization courses, workshops with a focus on energy, resources and the environment.  
**(1393 Scopus articles)**

## SDG7 in numbers

**46% of research projects**

**19% of students enrolled in specific study programs**

## GOAL 8. DECENT WORK AND ECONOMIC GROWTH

Decent work in safe and stable conditions is a vital component in eradicating poverty and maintaining good health. Universities as employers must provide and educate in such a perspective, and as innovators they can identify advanced and fair ways of working.

UTCN is a promoter of the idea of economic growth through decent work in optimal conditions and ensuring a healthy and safe context.

## GOAL 9. INDUSTRY, INNOVATION, INFRASTRUCTURE

This objective focuses on providing an infrastructure capable of supporting sustainable development. Economic growth and the continued provision of health services, education and a decent standard of living are based on a quality infrastructure, and innovation, science and technology are crucial for the development of a sustainable infrastructure.

UTCN considers research essential in the analysis and solution of global problems, which is why it provides mechanisms to stimulate research and publish results with maximum impact and visibility.

## SDG9 in numbers

**More than 120 research projects**

**Over 290 patents**

## GOAL 10. REDUCED INEQUALITIES

**10 REDUCED INEQUALITIES**

The reduction of inequalities is reflected in every aspect of sustainability, through the way of meeting the objectives, offering a broader perspective than the objective of gender equality, which refers only to gender inequities.

UTCN reflects this objective in all its processes, constantly contributing through policies and actions in this regard

## GOAL 11. SUSTAINABLE CITIES AND COMMUNITIES

The objective promotes sustainable cities and communities, reducing the negative impact of cities on the environment, supporting an inclusive, safe, resilient and sustainable context for cities and their communities. UTCN carries out the promotion and protection of the tangible cultural heritage in the spaces in which it operates, offering open access and ensuring their good conservation by identifying the necessary resources. Through the projects in which it is involved, the University aims to support the intangible cultural heritage by investing in projects and events that promotes this heritage, it also ensures the promotion and support of a sustainable development of the cities where the material heritage resides. **(527 Scopus articles)**

Night of museums, Night of companies, Night of researchers --Annual scientific events as organizer or participant

## GOAL 13. CLIMATE ACTION

Climate change affects every part of society in every country. Universities must be the promoters of actions to reduce the impact generated by climate change, acting in such a way as to address these approaches through research, education and the permanent reduction of the carbon footprint.

UTCN recognizes the importance of a unified, effective and efficient approach to this issue, which is why it has designed policies and action plans in this regard. TUCN recognizes the determining role of the University in the community and society in analyzing the challenges generated by climate change and sustainability. It is proposed to create a framework in which all university students will graduate with a good understanding of the issue but also with a minimum of expertise in identifying the souls for future generations

## GOAL 15. LIFE ON LAND

Maintaining biodiversity is a challenge in the face of climate change and the increasing degree of damage to nature through human intervention. Universities must contribute to the sustainability of biodiversity at the level of Campus and external ecosystems. UTCN has initiated various observation projects by collecting data and processing them to assess potential risks.

## GOAL 17. PARTNERSHIPS FOR THE GOALS

**17 PARTNERSHIPS FOR THE GOALS**

This goal reflects the fact that partnerships are necessary to ensure sustainable development goals. Partnerships designed for common goals are stronger if they are made between governments, industries and civil society. This objective includes various elements such as financial and development support, public policies, access and development of innovative technologies, development of various resources addressing a whole palette of systemic aspects.

**More than 80 strategic partnerships**

## Section III. PROGRESS in Sustainable development goals—academic year 2023-2024

Complementary to the permanent activities, the 2023-2024 academic year contributed significantly to the implementation of the sustainable development objectives established by the University's Sustainable Development Strategy and ensuring the policies defined at the institutional level.

Significant results were noted at the level of the following Sustainable Development Objectives, as evaluated by [THE impact ranking 2025](#):

**SDG7 and SDG9** – International projects carried out in the field of **Clean Energy and Innovation in industry and infrastructure**—**FIRST place at national level**

**SDG4 - Quality education** - new specialized master's programs in the field of sustainable development, -National center of competence and solutions for the development of climate-neutral and intelligent cities- NEtZeroCities (partner), European Project -DIH4Society Digital Innovation Hub for a Smarter Safer and more sustainable Society, InnoEUT- Innovative University of Technology- the EUT+ project for innovation in education, Digitalization Strategy of Cluj Napoca Technical University-**SECOND place at national level**

**SDG11** - Actions and projects specific to Sustainable Communities from a cultural perspective and institutional investments for urban regeneration-**THIRD place at national Levele**

**SDG13** - International projects in the field of climate actions (Netzerocities ,Entrainier,Evelixia, REnHomes)

**SDG1** - No poverty by increasing the number of Summer Schools, diversifying and multiplying the type and number of scholarships offered by the University, free postgraduate programs for SMEs

**SDG3** - Health and well-being thanks to innovative projects won at international level

**SDG17** - New strategic partnerships initiated (Lookheed Martin, ENIHEI,Continental, Bosh, NXP, INCDCI)

## GOAL 1. NO POVERTY

This objective aims at how universities address the problem through all their actions and initiatives, having a direct role in reducing the degree of poverty in their own community, both through quality education and through concrete material support, thus reducing the degree of intergenerational poverty.

UTCN considers it a priority to support the smooth running of the educational process and the formation of skills and competencies needed on the labor market, thus through its partnerships it has achieved the continuous provision of a set of scholarships that reward excellence and creativity.

## SDG1 progress in numbers

**61% increase in the number of students participating in counseling activities**

**80 scholarships and 60 funding grants**

**90 students enrolled in personal development programs**

**>120 students in admission preparation programs and >200 students in remedial programs**

**>60 teams in Boboc UTCN**

## GOAL 3. GOOD HEALTH AND WELL BEING

Ensuring a healthy life and promoting well-being, regardless of age, is an essential component of sustainable development, which can be addressed both through the correct identification of various diseases and through the implementation of intelligent solutions capable of increasing the degree of physical or mental comfort, respectively to monitor or maintain a certain level of health. UTCN has remarkable results in this field through its presence in a series of international research projects, through the implementation of practical solutions adapted to certain needs in the CESTER Robotics Research Center and through continuous monitoring of the health status of community members.

**23% new research projects relevant to SDG3**

**2 new multi-sports facility**

**>8 international conferences organized**

## GOAL 4. QUALITY EDUCATION

Quality education is essential for sustainable development, being an area in which universities excel. Inclusive and equitable education supports the addressing of various challenges specific to sustainable development, is a mechanism for reducing inequities and improving the quality of life.

UTCN aims to support the increase of the quality of life and the level of well-being through support measures to ensure lifelong learning (LLL-lifelong learning), by providing access to various types of educational resources, courses and scientific events.

## SDG4 progress in numbers

**1 Center of Excellence in Artificial Intelligence operational**

**Partener in 1 National Competence Center and solutions for the development of climate neutral and smart cities**

**4 new laboratory and 1 Research center, 2 Master programmes for sustainability education**

## GOAL 7. CLEAN AND AFFORDABLE ENERGY

This objective proposes global, equitable access to safe, sustainable energy in an accessible manner, being essential because modern energy supports the other sustainable development objectives. UTCN provides education and research conditions in modern spaces, in compliance with the latest energy efficiency standards. The university organizes a series of support activities such as specialized master's courses, postgraduate specialization courses, workshops with a focus on energy, resources and the environment. **1 new Master's program**

**>300 students enrolled in specific study programs**

## GOAL 9. INDUSTRY, INNOVATION, INFRASTRUCTURE

This objective focuses on providing an infrastructure capable of supporting sustainable development. Economic growth and the continued provision of health services, education and a decent standard of living are based on a quality infrastructure, and innovation, science and technology are crucial for the development of a sustainable infrastructure.

UTCN considers research essential in the analysis and solution of global problems, which is why it provides mechanisms to stimulate research and publish results with maximum impact and visibility.

**68 new international and national projects with industrial partners**

**7 new patents out of a total of 138 in the last 5 years**

## GOAL 11. SUSTAINABLE CITIES AND COMMUNITIES

The objective promotes sustainable cities and communities, reducing the negative impact of cities on the environment, supporting an inclusive, safe, resilient and sustainable context for cities and their communities. UTCN carries out the promotion and protection of the tangible cultural heritage in the spaces in which it operates, offering open access and ensuring their good conservation by identifying the necessary resources. Through the projects in which it is involved, the University aims to support the intangible cultural heritage by investing in projects and events that promotes this heritage, it also ensures the promotion and support of a sustainable development of the cities where the material heritage resides. **5 new European projects on the SDG11**  
**>10 public expositions and project demonstrations**

## GOAL 13. CLIMATE ACTION

Climate change affects every part of society in every country. Universities must be the promoters of actions to reduce the impact generated by climate change, acting in such a way as to address these approaches through research, education and the permanent reduction of the carbon footprint.

UTCN recognizes the importance of a unified, effective and efficient approach to this issue, which is why it has designed policies and action plans in this regard.

## GOAL 15. LIFE ON LAND

Maintaining biodiversity is a challenge in the face of climate change and the increasing degree of damage to nature through human intervention. Universities must contribute to the sustainability of biodiversity at the level of Campus and external ecosystems.

UTCN has initiated various observation projects by collecting data and processing them to assess potential risk.

## GOAL 17. PARTNERSHIPS FOR THE GOALS

This goal reflects the fact that partnerships are necessary to ensure sustainable development goals. Partnerships designed for common goals are stronger if they are made between governments, industries and civil society. This objective includes various elements such as financial and development support, public policies, access and development of innovative technologies, development of various resources addressing a whole palette of systemic aspects.

## Appendix 1. Indicators from Sustainability strategy and degree of achievements

No.	Measure	Indicators	Degree of achievements (0-4)	Term
ER1	Integration of concepts, mechanisms and approaches on sustainable development in the educational programs of the University	Number of courses that integrate aspects of sustainable development (min 30% of the courses in the Curriculum integrates notions of sustainable development) Number of dedicated courses (min. 1/year) Number of specific courses (min 5% of the total courses)	3	Ongoing
ER2	Encouragement and support offered to non-formal education initiatives for sustainability in the University	Number of courses, workshops, summer schools (min. 2/year) Number of students (internal/external) participants	2	Ongoing
ER3	Participation of the technical staff of the General Administrative Directorate in training sessions, and development of competences in the field of sustainable development and energy efficiency, through <i>in-house</i> courses	Number of courses (min. 2/year) Number of participants (approx. 20)	0	2024
ER4	Proposing and implementing research and development projects in areas related to sustainable development (according to the 17 SDGs - Sustainable Development Goals)	Number of research projects (min. 2/year) Number of publications (min. 200) Number of associated events (min. 2)	4	Ongoing
ER5	Supporting and promoting pilot demonstration projects such as <i>living labs</i> , regarding innovative solutions with applicability in the University's own buildings aimed at energy efficiency, renewable sources, smart buildings, etc.	Number of pilot projects (min. 2)	3	2025
E1	Increasing awareness and involvement of the university and local community on the subject of energy efficiency and the transition to clean energy, through information campaigns and training in the field. Launch of materials to promote energy efficiency in buildings: guides, posters, stickers	Number of campaigns/year (min. 2)	1	Ongoing
E2	Development of a Community-wide network for monitoring energy consumption on campus. Installation of smart thermostats (temperature, humidity, Co2) Designation of an Energy Manager	Monitoring structure Energy Manager	0	2024
E3	Monitoring the level of energy consumption and emissions, as well as the measures to reduce the CO <sub>2</sub> emissions at the level of the University's buildings and infrastructure;	Annual Report	1	Ongoing

No.	Measure	Indicators	Degree of achievements (0-4)	Term
E4	Develop a <i>Sustainable Climate and Energy Action Plan (PACE)</i> for the major renovation of TUCN buildings and to significantly reduce energy consumption and greenhouse gas emissions, in line with the ER resolution	Plan PACE Increase energy efficiency min.45% -2030 vs 2012 Increase Decarbonization min 80% - 2030 vs 2005	1	2023
E5	Coordination of accessing and allocating financial resources, with priority non-reimbursable in order to significantly increase the comfort and energy efficiency of the patrimonial buildings	Number of projects (min.2/year)	4	Ongoing
E6	Implementation of energy-efficient lighting systems (motion sensors in corridors and toilets, the classrooms equipped with presence sensors, photovoltaic lighting devices for outdoor lighting of dormitories) Development of electric vehicle supply infrastructures adjacent to buildings	Min 30% LED lighting Number of stations (min.2)	4	2024
E7	Implementation of infrastructures to support transformations in the heritage of buildings, where possible, to become prosumers	15% of energy from renewable sources Number of prosumer buildings (min. 1)	4	2024
E8	Green-buildings certification for new spaces under renovation	Certificates for new buildings on Campus (BT and CM)	4	2024
CC1	Raising awareness in Campus and Community about the appreciation of biodiversity for ecosystem health, well-being and personal health through information actions and promotional materials	Number of information actions (min. 1)	1	Ongoing
CC2	Prioritizing the employment of students in various social and sports activities.	Number of students (min. 25%)	4	Ongoing
CC3	Development of Community-wide initiatives to support and monitor physical and mental health (safety of Internet use, cyberbullying)	Number of shares (min. 1 /semester)	1	2024
CC4	Development and implementation of a sustainable procurement policy	Acquisition policy 25% of sustainable purchases	4	2024
CC5	Development and implementation of a waste management policy, reduction of paper consumption and single use of plastic containers. Implementation of eco-containers.	No eco-containers (min.2) Plastic free campus 2030 50% reduction of paper consumption 2025	3	2024

No.	Measure	Indicators	Degree of achievements (0-4)	Term
CC6	Reducing water consumption. The use of rainwater for the maintenance of green spaces in the Campus and sanitary systems	10% yearly	3	Ongoing
CC7	Active transport (bicycles, electric vehicles) carried out, and Campuses with prioritized pedestrian access, made with the support and collaboration with the local public administration, that already implemented its own public policies and infrastructures, as the University has a city distributed structure of the Campus	Specific spaces for bicycle parking (min 1 / site on Campus) Electric vehicles (min. 2)	4	2024
GP1	Development of the "Green University" Charter, in accordance with international and national policies	Green Metric UI Rating and Certification	4	2024
GP2	Establishing new strategic partnerships at the level of the local, national and international community for the implementation of the SDG objectives. Establishing new strategic partnerships at the level of the local, national and international community for the implementation of the SDG objectives	Number .of Partnerships (min 2/year)	4	Ongoing
GP3	Evaluation and documentation of the University's progress in achieving the established targets correlated to the Sustainable Development Goals (the 17 SDGs)	Sustainable development goals Report	4	yearly
GP4	Dissemination and transfer of knowledge and results within the Consortium of Technical Universities in Romania ARUT	Number of meetings / workshops (min. 1)	4	Ongoing
GP5	Dissemination and transfer of knowledge and results within the EUT+	Number of meetings / workshops (min. 1)	4	Ongoing

and from the Newsletters regarding the activity of the Board of Directors, and the statistical bibliometric data are taken from Scopus SciVal (<https://www.scival.com/home>).

These data represent the activities of the community of teaching staff, researchers and students within the Cluj-Napoca Technical University and reflect their alignment with the Sustainable Development Goals.

Cluj-Napoca, November 1st, 2025 Eng. Cosmina IVAN

Thanks to the Academic Community for the effort made in achieving the sustainable development goals.
